Claims 1-3 and 17-30 are presented for examination.

The claims will be examined to the extent that they read on the elected subject matter.

The amendments and remarks filed on October 12, 2006 have been received and entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 17-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Japanese Patent Abstract JP02001008695. The Japanese Patent Abstract teaches the use of myricetin for the treatment of Alzheimer. See the abstract.

The amendments filed on October 12, 2006 necessitate the new ground of rejection.
